

Rana İşlek

CRM & Growth Analytics | Data-Driven Marketing | Product Analytics

📍 Şişli / İstanbul 📞 +90 505 224 82 96 ✉ islekrana@gmail.com 💼 [linkedin.com/in/ranaislek](https://www.linkedin.com/in/ranaislek) 🐙 github.com/ranaislek

Profile

CRM Data Analyst on the Growth & Marketing team at Trendyol, working on segmentation, multi-channel lifecycle campaigns, and A/B-tested growth strategy for the Azerbaijan market. MSc in Big Data Management & Analytics (Erasmus Mundus) with a Computer Science & Engineering background. Skilled in SQL (BigQuery) and Python for large-scale behavioral data analysis, KPI and business-rule definition, and automated reporting, turning data into decision-ready growth insights.

Technical Skills

Programming Languages: Python, SQL

CRM & Growth Analytics: Segmentation, targeting, and lifecycle campaign design (push, in-app, email, coupons); A/B testing and experimentation; KPI and business-rule definition

Data Visualization: Power BI, Looker Studio; KPI reporting and data storytelling

Tracking & Product Analytics: Google Analytics, Google Tag Manager; event-based tracking, funnel and micro-conversion analysis

Databases & Automation: BigQuery, PostgreSQL, Airflow; automated reporting pipelines, Git, Linux

Industry Experience

Trendyol

Mar 2026 – Present

CRM Data Analyst, Growth

Istanbul, Türkiye

- Owning segmentation and targeting strategy across the AZR and GE markets, designing multi-channel lifecycle campaigns (push, in-app, email, coupon-code discounts) from onboarding through retention, balanced against transaction- and session-based performance targets (Python, BigQuery, Airflow).
- Coordinating influencer data and communication across all regions, partnering cross-team with Marketing, Product, and brand stakeholders to track influencer-driven performance alongside core CRM channels (BigQuery, Python).
- Analyzing large-scale behavioral data (SQL, Python, BigQuery) to define KPIs and run A/B tests, and owning the optimization of CRM communication automations, including their development through AI integration (Airflow), in partnership with Product.

NGN

Oct 2025 – Feb 2026

Data & Analytics Specialist

Istanbul, Türkiye

- Leading the design and rollout of the company's internal data foundation by researching, planning, and implementing end-to-end ERP/CRM-aligned data flows, including the design and automation of analytics-ready data pipelines with strong guarantees on data quality, consistency, and traceability for downstream reporting and dashboards.
- Managing Salesforce reporting and CRM data governance while designing the target data architecture (single source of truth, ownership, definitions) to ensure reliable, clean, and seamless data management across business units.
- Building and maintaining a C-level Power BI dashboard and multiple department dashboards for daily operational reporting, partnering cross-functionally to define KPI logic, align metric interpretation, and drive adoption of standardized metric definitions.

Delivery Hero Tech Hub (Yemeksepeti)

Jun 2022 – Aug 2022

Product Analyst Intern

Istanbul, Türkiye

- Supported global Delivery Hero teams via analytics projects on the Yemeksepeti app; built a C-level KPI dashboard on BigQuery + Looker Studio across multiple brands/markets.
- Defined and computed micro-conversion metrics by analyzing user-journey sequences from analytics event/session data (SQL).
- Improved KPI consistency by aligning tracking implementation with stakeholders via Google Analytics and Tag Manager.

SabancıDx

Jul 2021 – Aug 2021

Advanced Analytics Intern

Istanbul, Türkiye

- Developed Python-based ETL workflows to analyze workspace usage and propose data-driven seating optimizations.

Research Experience

University of Padua

Sep 2024 – Dec 2025

Research Assistant (Machine Learning Group, Erasmus Mundus M.Sc.)

Padua, Italy

- Completed a research internship in the UniPD Machine Learning group as part of the Erasmus Mundus Joint Master's Program, while conducting my master's thesis on constrained molecular graph generation with discrete diffusion models.
- Implemented reproducible experiment pipelines and sampling-time constraint enforcement, and built evaluation scripts for validity/uniqueness/novelty and constraint satisfaction (Python, PyTorch, Hydra, RDKit).

PURE (Sabancı University)

Mar 2022 – Jun 2022

Quantum Physics Research Assistant

Istanbul, Türkiye

- Conducted research on quantum free fall, and assisted Prof. Durmus A. Demir through experiments and literature review.

Theses & Startup Projects

Constrained Molecular Graph Generation with Diffusion Models <i>Master's thesis + research internship</i> - Surveyed existing methodologies for molecular generation and positioned the work within state-of-the-art diffusion-based models. - Utilized a discrete diffusion framework for molecular graphs and introduced ring-based structural constraints (ring count and ring length) enforced deterministically at sampling time. - Verified the mechanism by achieving 100% constraint satisfaction across multiple settings of maximum ring count and ring length, while maintaining strong performance on standard molecular generation metrics (validity, uniqueness, novelty) using a reproducible evaluation pipeline (Python, PyTorch, RDKit, Hydra).	Feb 2024 – Dec 2025 <i>University of Padua</i>
Smart Complaint Tracking System — AI Hackathon Project <i>Real-time Data Analytics & NLP Pipeline</i> - Built an end-to-end real-time data pipeline to ingest, process, and categorize unstructured citizen complaints using NLP-based preprocessing and embedding-based similarity, enabling near-real-time grouping into actionable categories (Python, pandas). - Designed and delivered real-time dashboards tracking complaint volumes, category distributions, and operational KPIs, supporting data-driven prioritization and reducing manual inspection effort (Power BI, PostgreSQL).	Dec 2025 <i>Tech Istanbul, Smart City Hackathon</i>
ScholarIA — AI-powered Platform for Academic Paper Management & Recommendation <i>Startup Project</i> - Built an all-in-one research assistant for paper library management (upload/organize/search) and reading workflows (quick notes), including paper summarization and LLM-driven utilities to streamline literature review (deployed on Vercel). - Implemented personalized recommendations and alerts using a semantic-intersection-based approach over papers in the workspace, producing context-aware suggestions via embedding similarity on paper content/abstracts. - Conducted market research and user surveys to define target personas and a freemium pricing model; selected as the #1 among projects in our master's cohort, and encouraged to continue through an incubator program.	Feb 2024 – Dec 2024 <i>UPC, Barcelona</i>

Education

Master's Degree - Erasmus Mundus Joint Master's in Big Data Management & Analytics - Università degli studi di Padova, (<i>Padua, Italy</i>) - Universitat Politècnica de Catalunya, (<i>Barcelona, Spain</i>) - Université Libre de Bruxelles, (<i>Brussels, Belgium</i>) - Selected coursework: Deep Learning, Data Analytics, Database Management, Statistics, Machine Learning.	Sep 2023 – Dec 2025 Specialization: Statistics & Deep Learning (<i>Sep 2024 – Dec 2025</i>) (<i>Feb 2024 – Jun 2024</i>) (<i>Sep 2023 – Feb 2024</i>) Grade: 102/110
Bachelor's Degree - B.Sc. in Computer Science & Engineering (Minor: Decision & Behavior), Sabancı University - Erasmus+ Exchange: Budapest University of Technology & Economics (2022–2023)	Sep 2019 – Jun 2023 <i>Istanbul, Türkiye</i> GPA: 3.35/4.00

Volunteering & Extracurricular Activities

Enactus Italy – “Purifas” Project Member & IT Manager <i>Università degli studi di Padova</i> Co-developed a biosensor for PFAS detection; won the ReGeneration Hub Friuli Award and NanoValbruna mentorship.	Sep 2024 - Dec 2025 <i>Award: May 2025</i>
President, SU Dance Club <i>Sabancı University</i> Led a student dance community and hosted 400+ attendees at “SuDance Night”; received the Non-Academic Creativity Prize.	Sep 2019 – Jun 2023 <i>Award: May 2023</i>
President, Computer Society of IEEE <i>Sabancı University</i> Organized computer science talks and panels with industry experts; coordinated event operations and speaker management.	Sep 2020 – Feb 2021
Primary School Tutor (Civic Involvement Project) <i>CIP, Sabancı University</i> Visited a local elementary school weekly and taught children about science and social issues.	Sep 2019 – May 2020 <i>Ahmet Yesevi Elementary School, Istanbul</i>
Content Creator (YouTube) <i>Erasmus+ & master's vlogs, talks</i> Created content focused on studying abroad (Erasmus+, Erasmus Mundus) and master's experiences through vlogs and talks.	2019 – Present
